# SCALLOPLIGHT FITTING INSTRUCTIONS

## BATTERY REPLACEMENT

### Step 1

Unscrew cap in a clean and dry environment.

### Step 2

Replace battery ensuring polarity is correct.

### Step 3

Make sure thread and O-rings are free from dirt. Apply additional lube to O-rings if required. Screw base and cap firmly together ensuring O-rings become compressed.

## FITTING THE SCALLOPLIGHT INTO POTS AND TRAPS

ScallopLights should be attached to the interior of the pot/trap so that the light is directly in front of the entrance eye as shown below. We recommend the use of cable ties or snaps with this product for rapid installation and removal from gear.

**RECOMMENDED USE:**  
ONE LIGHT PER POT/TRAP.

## TECHNICAL SPECIFICATIONS

LED colour	White
Battery Life	1500 hours (2 months)
Dimensions	Length 173mm   Diameter 60mm
Weight (with D Cell battery)	385g
In-water Weight	65g
Depth Rating	1000m
Battery Type	1 x Alkaline D-Cell
Immersion Switch	Automatic immersion switch
Attachment Hole Diameter	8mm
ScallopLight Housing Material	Injection moulded polycarbonate
Light Intensity	4 lm

ScallopLight is programmable and bespoke models are available on request. Please contact [info@fishtekmarine.com](mailto:info@fishtekmarine.com) for more information.
